SUMMARY

Graduate student pursuing a **Master's in Cybersecurity** at the University of Georgia, actively seeking full-time opportunities in Cybersecurity and IT. Experienced in threat detection, incident response, log analysis, and vulnerability assessments. Proficient with tools such as Splunk and Wireshark, with a strong understanding of security frameworks like NIST and CIS Controls. **Security+ Certified**, with hands-on project experience in **malware analysis**, phishing simulations, and **risk assessments**. Eager to contribute to a team dedicated to strengthening organizational security and resilience.

EDUCATION

University of Georgia , School of Computing	Athens, GA
<i>Master of Science, Major: Cybersecurity and Privacy (GPA - 3.7/4.00)</i>	May 2026
SRM University	Andhra Pradesh, India
<i>Bachelor of Technology, Computer Science (GPA – 9.0/10.00)</i>	April 2024

TRAINING & CERTIFICATES

- **CompTIA Security+ Certificate:** Includes Access Control, Security Configuration, Network Security.
 - **Skills include** Firewall configuration, Identity and Access Management (IAM), Security Awareness, Data Loss Prevention (DLP), Incident Response, SIEM.
- **Google Cybersecurity Certificate:** Includes Linux, MySQL, and Python hands-on labs.
- **MSME – Digital Forensics and Cyber Law:** Includes Cyber Forensics, Malware Identification, Disaster Recovery Planning, Data Security.
- **Python Problem Solving (Intermediate),** Hacker Rank | 2021

PROFESSIONAL EXPERIENCE

UGA Carl Vinson Institute of Government - CyberArch	Athens, GA
<i>Risk Review Report Team Lead</i>	March 2025 – Present
■ Implemented in-depth cyber security risk assessments for Georgia's communities using CIS controls v8.0 as the framework reducing the chances of a cyberattack by 80%. ■ Managed onsite/remote evaluations on the organization's application security and providing infrastructure hardening and providing baselines. ■ Provided actionable recommendations based on NIST and CIS Controls, helping organizations identify gaps and enhance their overall security posture.	

SATRA Services and Solutions Private Limited	Hyderabad, India
<i>App Development Internship</i>	June 2022 – August 2022
■ Developed interactive mobile app prototypes using Figma with adherence to UI/UX best practices. ■ Created automated reports achieving 90% accuracy from the 500+ rows of data using SQL Server Reporting Services (SSRS) to assist internal project tracking.	

PROJECTS & INITIATIVES

Real Time Phishing Detection and Documentation - TryHackMe	
■ Investigated and closed real time phishing alerts by monitoring PCAP files enhanced SIEM detection capabilities by developing and tuning custom correlation rules, resulting in a 20% increase in true positive identification and a 30% reduction in false positives. ■ Achieved a Mean Time to Resolve (MTTR) of 7 minutes and a Mean Dwell time of 22 minutes, indicating efficient detection and rapid remediation.	
UGA CyberArch Cyber Security Summer Camp – Team Lead	June 2025
■ Led hands-on workshops for 25 students, featuring live demonstrations of Wireshark traffic analysis, real-time breach response, and password cracking using Hashcat. ■ Designed and delivered technical content that sparked cybersecurity career interest in over 85% of the participants, highlighting the real-world impact of digital threats.
